# docmangp

Streamline practice management.

A complete, standalone intranet and discussion platform with Docman **Practice Manager**.

# A complete standalone intranet and discussion platform for **streamlined practice management**.

Docman Practice Manager provides easy to use software to manage all of your non-patient documents and back office processes.

Consisting of BackOffice Library, Apps and Collaborator, Practice Manager will provide your practice with the necessary software to streamline your processes, work as a practice intranet and organise all non-patient data and documents seamlesly and electronically.

Supporting you with CQC

No paper logs or notes

Full auditability
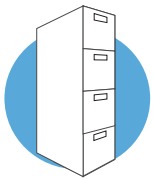

Practice management software to manage all non-clinical documents in one place.

Set privacy settings for each user to ensure confidential information is kept private and practice documents are available to all users.

Find documents instantly by tagging and categorising documents so they can be quickly and easily found when needed.

**Supporting you with CQC requirements** by collecting and storing information with CQC standards.

Improve internal communications with full audit trails and through discussing and managing documents as a team.

delivering paper free care

Collaborator

Collaborator provides a fully audited discussion platform for everyone to organise, manage, share and discuss patient or business matters. This is especially useful when other clinical opinions are needed for patient issues.
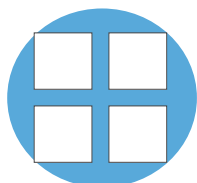

BackOffice Apps

BackOffice Apps give you a way to log practice data in different platforms. These include Fridge Temperature Logs, Significant Events and Birth Registers, presenting you with data that's consistent and accessible.

BackOffice Library

BackOffice Library will store practice documents in one place for all Docman users to access, depending on their security settings.
It removes the need to search through piles of paper copies of practice procedures and health and safety guidelines, when documents can be quickly and easily found.

You take care of the patients.
We'll take care of the documents.

> **"** BackOffice Library has improved our business processes and will ultimately save us a lot of time searching for information. This will improve our service to patients by having fast access to information and policies to inform the patient instantly. **"**

Norman Brown, Shropshire Walk in Centre

> **"** Docman has transformed the way we work and has revolutionised the way we handle clinical documents. BackOffice Apps are now helping us to bring that same high level of quality and consistency to our other data. **"**

Geoff Dennis, The Falmouth Health Centre

> **"** Docman provides the practice with a sophisticated document management service that allows us to provide excellent care to our patients. In addition they provide great support. **"**

Mark Taylor, Churchill Medical Centre
